

## **Action Plan: QuickTime**

**Implementation Date:** January 24, 2006

**Last Review:** January 7, 2008

### **1. Ingest Processing**

- Identification: Yes.
- Validation: Yes.
- Characterization: Yes.
- Normalization: Yes.
- Migration: No.

### **2. Significant Properties**

To be determined.

### **3. Long-term Preservation Strategy**

#### **3.1 Long-term Preservation Strategy for the Original**

Migrate to an open, standardized and well supported multimedia file format that is to be a good successor for the QuickTime file format.

No normalized version will be created for QuickTime movie files. However, each video/audio stream contained in a QuickTime file will be normalized according to the Action Plan for FDA Supported Video/Audio Stream Formats. If the encoded video/audio stream is not in the list of FDA supported video/audio stream formats for QuickTime movie file, the video/audio stream will not be normalized and it will be preserved as bit-level.

#### **3.2 Long-term Preservation Strategy for the Normalized Version(s)**

Not applicable for QuickTime file format. For the normalized video and audio stream formats, please see the Action Plan for FDA Supported Video/Audio Stream Formats.

### **4 Timetable of Anticipated Short-term Actions**

None.

### **5 Timetable of Action Plan Review and Revisal**

Review and revise action plan in 3 year (January 2012).

**Note: This action plan is currently under discussion and is subject to change.**
